WORK EXPERIENCE

Accenture BGC, Taguig
Associate Software Engineer May 2026 – Present

- Managed and resolved application support tickets using ServiceNow, leveraging Splunk and Dynatrace to monitor applications, analyze logs, and investigate errors..
- Utilized Oracle SQL and Microsoft SQL Server (MSSQL) to query and analyze database records, validate data, and troubleshoot application issues.
- Used Unix/Linux for script execution, log analysis, application monitoring, and troubleshooting production issues.

Freelance Remote
Software Developer Jun 2025 – Present

- Developed and deployed 5+ full-stack web applications, improving client workflow efficiency by ~30%
- Diagnosed and resolved critical bugs, increasing application stability and reducing user-reported issues
- Designed and implemented data models and database schemas to support application workflows.

University of the Philippines - Information Technology Development Center Diliman, Quezon City
Software Developer Intern Sep 2024 – Dec 2024

- Migrated a legacy PHP system to Laravel, reducing server costs by 30% and improving maintainability
- Contributed to internal systems used by 60000+ users, enhancing usability and supporting daily workflows
- Integrated secure authentication systems using Spatie and Tenancy, ensuring safe user access and session management

PROJECTS

Salapi 2026

- Built a React budgeting application supporting multiple users within shared wallets for collaborative expense tracking
- Implemented offline functionality, allowing users to access and manage budgets without an active internet connection.

LAUNDRY POS & INVENTORY SYSTEM 2026

- Developed a React and Supabase POS and inventory management system for a local laundry business.
- Digitized manual handwritten workflows, improving transaction tracking, inventory management, and day-to-day operations.

Focusly (Productivity App with kanban board) 2025

- Developed an AI-powered productivity application featuring Kanban boards and Pomodoro-based focus sessions.
- Implemented task management and productivity tracking features to help users organize work and monitor their progress.

E-commerce and Inventory System (thesis project) 2024

- Developed a React and Express.js e-commerce and inventory system for a school uniform and book store.
- Streamlined the purchasing process, reducing customer queue time and improving transaction efficiency.
